

Plant Lay-out Workshop

Description:

This hands-on, immersive 1-day workshop is designed to tackle the critical aspects of plant layout planning, helping businesses enhance operational efficiency, streamline workflows, and optimize space utilization. The workshop will cover the key principles of plant layout design, process flow optimization, and strategies for maximizing both productivity and safety within manufacturing or production environments. The workshop will include practical exercises, case studies, and interactive discussions to solidify understanding and application of the concepts.

Duration: 1 Day (8 Hours)

Class Size: 12 Max

Target Audience: Managers, Supervisors, Lean Practitioners, Engineers

Pre-requisites: None

Outcomes:

- ✓ **Understand Plant Layout Principles**, learn key layout types and how to optimize space, workflow, and efficiency.
- ✓ **Improve Process Flow**, design layouts to reduce waste, minimize handling time, and boost productivity.
- ✓ **Enhance Safety and Ergonomics**, integrate safety standards and ergonomic practices into your layout design
