

Single Minute Exchange of Die (SMED) Workshop

Description:

The **Single Minute Exchange of Die (SMED)** workshop is an engaging, hands-on training designed to help manufacturing professionals dramatically reduce changeover times on their equipment. This course focuses on introducing the principles of SMED, aimed at eliminating inefficiencies, reducing downtime, and improving overall production productivity.

Duration: 1 Day (8 Hours)

Class Size: 15 Max

Target Audience: Production Managers, Supervisors, Team Leads, Manufacturing Engineers, Machine Operators, Lean Practitioners

Pre-requisites: None

Outcomes:

- ✓ **Confident in SMED Concepts:** Equipped with a solid understanding of SMED principles and how they apply to real-world scenarios.
- ✓ **Empowered to Identify Inefficiencies:** Capable of spotting and addressing changeover bottlenecks in their own processes.
- ✓ **Motivated to Apply New Techniques:** Ready to implement strategies that reduce downtime and improve productivity.
- ✓ **Inspired to Drive Change:** Energized to lead efforts in increasing production flexibility and efficiency.
